

**Brisant-BS
can stop him.**

BRISANT BS 

**The ultimate in locking security.
As standard.**

About your Brisant-BS lock

Anti-Drill

Located in both sides of every Brisant-BS lock are 4 anti-drill pins to thwart intruder entry with a drill.

Snap Resistant

If an intruder tries to snap your Brisant-BS lock he's left holding the sacrificial lock tip. The rest of the lock stays secure with its molybdenum core which is 25% denser than iron.

Anti-bump

If a 'bump key' is used to force entry into your home, Brisant-BS has pins which are designed specifically to repel the attacker.

Kite Marked

The Brisant BS has been rigorously tested by BSI to achieve the Kitemark standard including durability and performance.
