

**Brisant-E  
can stop him.**

**BRISANT E**

**Tried and tested snap protection.**

## About your Brisant-E lock

### Molybdenum Core

Brisant-E has a molybdenum core which is 25% denser than iron, the weak area of many standard locks.

### Snap Resistant

If an intruder tries to snap your Brisant-E lock he's left holding the sacrificial lock tip.

### Dual Colour

The experienced burglar recognises the dual colour signifies the cylinder has improved security features - a visible deterrent.
